

## Made-to-Measure Torso Support Corset Model 111

According to John, light version of Model 110

Article: Model 111

Article: Model 111

This Dynamic Torso Support Corset incorporates the bust and shoulder blades. It is very comfortable to wear and gives excellent support.

### Description / Function:

- individually made-to-measure
  - made with a single layer of breathable Jacquard elastic mesh
  - strengthened around the abdomen and the hips
  - vertical stretch panel in the back supported by two firm steels left and right of the spinal column
  - wide adjustable abdominal support (included)
  - pilot cloth band inside back panel for fitting pad
  - front zipper (under laid with hooks and eyes)
- comes semi-finished ready for fitting - with 6 seams opening outwards or can be ordered finished.

### Indication:

- Back pain combined with weakness in the abdominal wall and excess weight
- Lumbar problems, osteochondrosis, spondylosis
- Structural problems in the lumbar / sacral area
- Osteoporosis with reduction of the bone substance, slightly exceeding the norm for someone of that age, without danger of fractures. (From: The Aligners for the Back, by Prof. Dr. D Petersen and H. John, Thieme Verlag)

### Colours / Special Features:

Available in: skin tone and white

### Special Optional Extras: (examples)

- Fully opening front zipper
- fixed bottom closure
- removable bottom closure
- pad for lower back
- inner-belt – to support a sagging or pendulous abdomen (a hook and eye fastener is recommended for the inner-belt)

For further special optional extras please refer to our price list.
