

## Made-to-Measure Men's Surgical Corset Model 300

Article: Model 300

The Surgical Corset Model 300 incorporates the upper torso. Firm fabrics assure excellent support.

### Description / Function:

- made with two layers of Tulle elastic mesh (firm quality)
- back panel made with two layers of cotton Sateen
- front lined with cotton Sateen
- comes with 4 removable steels
- fixed elastic shoulder straps
- pilot cloth band inside back panel for fitting a pad
- front zipper under laid with hooks and eyes
- gives optimum support
- multi-sectional for superior fit

Comes semi-finished ready for fitting - with 6 seams opening outwards or can be ordered finished.

### Indication:

- Back pain combined with weakness of the abdominal wall, and excess weight
  - Gynecomastia (large male breasts)
  - Lumbar problems, osteochondrosis, spondylosis
  - Structural problems in the lumbar/sacral area
  - Osteoporosis with reduction of the bone substance, slightly exceeding the norm for someone of that age, without danger of fractures.
- (From: The Aligners for the Back,  
by Prof. Dr. D. Petersen and H. John, Thieme Verlag)

### Colours / Special Features:

Available in: skin tone, white and black

### Special Optional Extras: (examples)

- Fixed or removable jock (lower closure)
- Pad for lower back
- Wide adjustable abdominal support
- Inner-belt to support sagging or pendulous abdomen (a hook and eye fastener is recommended for the inner-belt)
- Zipper that does not open at bottom under laid with a hook and eye closure or only a hook and eye closure
- Cushioned non elastic shoulder straps 3 - 8 cm (1,5 - 3") wide
- Extra boning
